of

Biomaterials Applications Reviews

Volume 2

May 2008

All Contributions from the Students of AME 50571

Edited by Prof. Ryan K. Roeder

Published by the
Department of Aerospace and Mechanical Engineering,
University of Notre Dame, Notre Dame, Indiana

Table of Contents

Section I: Cardiovascular Applications		
Conrad, Timothy L.	Review of Polyurethane, Polyethylene Terephthalate and Expanded-Polytetrafluoroethylene in Vascular Grafts	4
Feely, Caitlin	Critical Review of Biomaterials Used in Septal Occluders	16
Kaltz, Zachary T.	Biocompatible Membranes and Materials for Use in Hemodialysis	26
Kane, Robert J.	Endovascular Treatment of Cerebral Aneurysms	35
Larson, John	Materials for Vascular Tissue Engineering: A Critical Review	51
MacKrell, Andrew	The Formation of Nonthrombogenic Neointima on the Blood Contacting Surface of Ventricular Assist Devices	60
Meagher, Matthew	Engineering Hemoglobin Vesicles as Blood Substitutes	73
O'Connor, Kerry	Review: Artificial Heart Valve Technology	88
Pineda Fortin, Emma T.	Hemocompatibility Considerations in the Total Artificial Heart	100
Rowland, Benjamin C.	Biocompatibility of Cardiopulmonary Bypass Tubing	110
Vahdati, Ali	Endovascular Stent Materials	119
<hr/>		
Section II: Dental Applications		
Goldsmith, Timothy	An Examination of the Materials Used in Modern Dental Crown Restorations	133
Herzog, Bob	A Comparison of Composite Veneers and Assessment of Possible Future Uses of Microfilled Composites as a Replacement for Anterior Porcelain Veneers	144
Suarez, Guillermo	Filling Materials and Properties for Dental Adhesives	154
Trombly, Caitlin	The Evolution of Orthodontic Braces	168
<hr/>		
Section III: Ophthalmological Applications		
Birk, Nick	Biomaterials in Orbital Reconstruction: Polyethylene and Titanium	182
Macaulay, Keri-Anne	The Use of Gold Weights in Eyelid Implants	194
Okonokhua, Imuetinya	Contact Lens: Biomaterials for the Ocular Environment	205
O'Reilly, Kyle	Critical Review of the Biomaterials Used for Corneal Implants: A Historical Study of Status Report	214

Table of Contents (Continued)

Section IV: Orthopaedic Applications		
Bove, Ryan	The Relationship between Wear Debris and Glenoid Loosening in UHMWPE Prosthetic Shoulder Implants	226
Cogill, John	Biological Tissue Ligament Reconstruction: Autograft and Allograft Tendon ACL Reconstruction	237
Courtney, Peter	Critical Review of Compression Plates Utilized in Internal Fracture Fixations	251
Cyr, Clinton	Biomaterials Used in Disc Replacement	266
Madrid, Dominic	Biodegradable Interference Screws: Biological Mechanisms that Affect the Device Performance Requirements	275
Paietta, Rachel C.	Synthetic Polymer and Polymer-Composite Bone Growth Scaffolds	284
Prygoski, Matthew	Crosslinking UHMWPE for Use in Total Knee Arthroplasties	297
Wagner, Claire	Porous Ingrowth Surfaces in Total Hip Arthroplasties	312
Section V: Pharmacological (Drug Delivery) Applications		
Collins, Kara	Use of Intelligent Biosynthetic Nanobiomaterials (IBNs) for Chemotherapy Drug Delivery	324
Patena, Bettina Marie	Microneedles for Enhanced Transdermal Drug Delivery	336
Sinclair, Susan M.	Controlled Release of Progestin Through Polymer Matrices for Drug Delivery in the Contraceptive Implant	349
Thomas, Richelle	Magnetic Nanoparticle Usage for Targeted Drug Delivery	357
Section VI: Other Applications		
King, Joseph	The Intrauterine Device: Mechanism of Action, Common Problems, and Improvements	370
Maulit, Claire	Critical Review of Materials Used in Microelectrode Arrays in Neural Prosthetics	385
Quijano, Fernando Jose	Silk in Suturing: The Role of a Natural Biomaterial	398
Rees, Justin F.	Review of Glass-Ionomer Cements as Utilized in Cochlear Implants	408
Rojas, J. Omar	Critical Review of Biomaterials Used in Breast Implants	420
Souder, John	Review of Materials Used in Ossicular Implants	430
