

# Table of Contents

---

Section I: Cardiovascular Applications		
Coughlin, Thomas R.	Pyrolytic Carbon in Mechanical Heart Valves	3
Kappes, Michelle Lynn	Biomaterials for Pacemaker Leads	20
Mrugala, Andrew S.	The Artificial Heart: Past, Present, and Future	29

---

Section II: Neurological Applications		
Keillor, Matthew	Bioelectrodes: An Electrochemical Interface with Biological Tissue	41
Mattix, Steve	Material and Biological Characteristics in Neural Interface Technology	50

---

Section III: Ophthalmological Applications		
Bonomo, Steven A.	Critical Review on the Applications of Corneal Implants	58
Kemnetz, Kristen	A Critical Review of Soft Contact Lenses	65
Lane, Patrick	The Design and Biocompatibility of Intraocular Lenses: A Review	73

---

Section IV: Orthopaedic Applications		
Cole, Lisa	Tissue Engineering Approached using Synthetic Polyester Materials or Tendon and Ligament Scaffolds	90
Darr, Alex	Wear Complications in Spinal Arthroplasty	105
Deranek, Kelly	Biodegradable Screws as Fracture Fixation Devices	116
Gargac, Joshua	Poly(2-hydroxyethyl methacrylate) Hydrogels as Synthetic Bone Scaffolds	128
Labus, Kevin	Metal Bone Ingrowth Scaffolds for Load-Bearing Applications	138
Meklis, Ashley M.	Osteolysis: The Mechanisms Behind the Process and Outcomes in Total Knee Arthroplasty	151
Tennant, Kyle	Isoelasticity of Composite Total Joint Replacement Implants	158

---

## Table of Contents (Continued)

---

### Section V: Other Applications

---

Dunphy, Christine	Materials of Absorbable Synthetic Sutures: Polydioxanone, Polyglycolic Acid and Polyglactin	169
Krzyskowski, Craig	A Critical Review of Endosteal Implant Surface Preparations on the Nanoscale	182
Leis, Eric P.	A Critical Review of Middle Ear Implant Technology	195
Ruffing, Christine S.	Breast Reconstruction Material Review	208
